opportunities

Experience Creative Suite 5

New Adobe Creative Suite 5 software and supporting resources help faculty teach — and students learn the digital communication and creativity skills they need for today's technology-driven workforce

Join Adobe for this exclusive seminar designed especially for Lake Washington Technical College. Learn how CS5 enables students and faculty to more easily create print, web, video, audio, and mobile content.

Adobe's integrated workflows help students in higher education programs focus on the aesthetic, emotional and creative impact of their work, not on the technology. With Adobe Creative Suite 5 software, teachers and students can spend more time developing creativity skills and advanced interactive content, not learning how to write code.
